

【Example 2】 Let's review how we wash our hands.

Theme	Let's review how we wash our hands.
Objective	Each child will be able to understand and practice proper hand washing methods to prevent infectious diseases, including the new coronavirus COVID-19.
Effective Instruction ideas	A simple experiment using diluted starch paste (Watery Starch Past) and iodine solution (Watery Iodine Solution) will be conducted to help the children understand whether their hand washing is appropriate or not.

Class Preparation	Watery Starch Past and Watery Iodine Solution Questionnaire on the actual state of hand washing among children Individual goal cards
-------------------	--

Time (minutes)	step	Teacher Activities	Children's Activities
3	1. Grasp	<ul style="list-style-type: none"> Based on the results of the questionnaire, the actual state of hand washing among children is shown. 	<ul style="list-style-type: none"> Understand it as your own problem.
22	2. Search	1. "How should I wash my hands?"	{Discussion.}
		2. "Let's do an experiment to see if that way of washing really clean make our hands clean or not." 【Experiment】 (See below)	<ul style="list-style-type: none"> In the experiment, find out if there are any parts that have turned blue- purple, and if so, where they are. (Understand that the areas that turn blue-purple are the areas that have not been washed well.)
15	3. Find	Distribute individual goal cards and have students write down their observations.	<ul style="list-style-type: none"> Observe the areas that are not washed well and record them on your individual goal card.
		1. "What should I pay attention to when I wash?"	{Discussion.} Discuss while observing the blue-purple colored areas.
5	4. Decide	2. " Let's try to wash it." 【Practice】	<ul style="list-style-type: none"> Based on the result of the discussion, wash your hands to remove the color of the parts with blue-purple color. (*This is the best way to wash your hands. You can also use soap here.)
		【Individual goal Card】 - Have them write on their Individual goal Card what kind of washing they will do in the future.	<ul style="list-style-type: none"> Fill in the Individual goal Card and present your Individual goal Cards to each other.

Instruction after the implantation	<ol style="list-style-type: none"> Continuous hand-washing practice is necessary to prevent the infection of new coronavirus COVID-19 and normal colds, so even after the implementation period is over, children should always be reminded in their daily lives. Even if they wash their hands properly, wiping wet hands with piece of cloths or dirty clothes will reduce the effect, so teach them to keep a clean handkerchief.
